Taste Editor &
Formula Sommelier

When the IPC is selected either via typing or the Recently Used list the dosage from the Placeholder will populate. This can be adjusted manually.

When the IPC and the dosage have been entered the user can continue with Inserting the IFF product to the candidate list or Validate the product.

Any warning Flags will be shown in the Audit area.

When the product is added to the Candidate list it will be showing in the list.

From the candidate list an IFF product can be validated by selecting Validate after clicking the three dots in the last column of the Candidate list.

- Via Formula Sommelier only – via Search results

The screenshot shows the Formula Sommelier application interface. At the top, there's a header with the IFF logo, version information (QAS Ver. 4.1.0 • Innovise), a warning banner (Warning: This is a Test Database), and user information (GBFL, EUR, Florian Plooy). Below the header is a search bar with filters. The main content area displays a table of tasks. The table has columns: Due Date, Task ID, Task Status, Project ID, Project Description, Project Status, Opportunity Type, Customer ID, Customer Name, Customer Region, End Use Code, and a final column with a magnifying glass icon and three dots. A red arrow points to the magnifying glass icon in the last column of the table. The sidebar on the left contains navigation options: Home, Product Search, Creative Review, Product Data, Feature Feedback, Custom Layout, Request Sample, IPC List, User Settings, and Help.

From the Task list hit the search button to populate the list of flavors most suitable for this TSR.

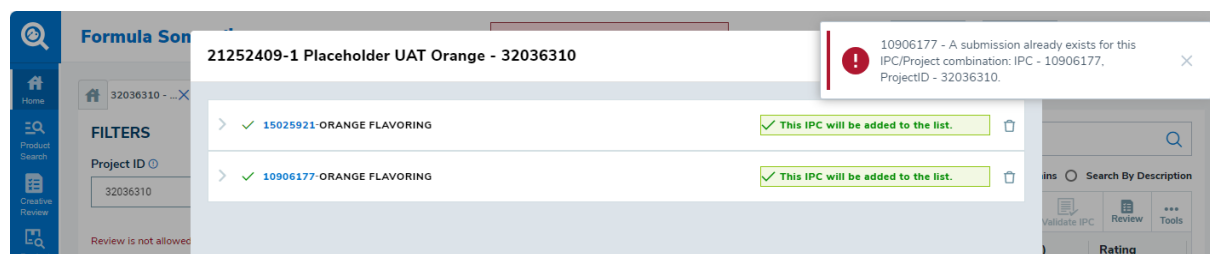

When one IFF product is selected the Validate IPC button will become available, similar to the Add/View Cart Button

When multiple products are selected, it is possible to add them to the candidate list through the Add/View Cart option. The validation option will be disabled because the system cannot run the Validation audit for more than one IPC at a time.

After clicking Add/View Cart, users can cancel, view the candidate list, or add to it. The initial audit will run, displaying warnings or flags that prevent adding the product to the candidate list.

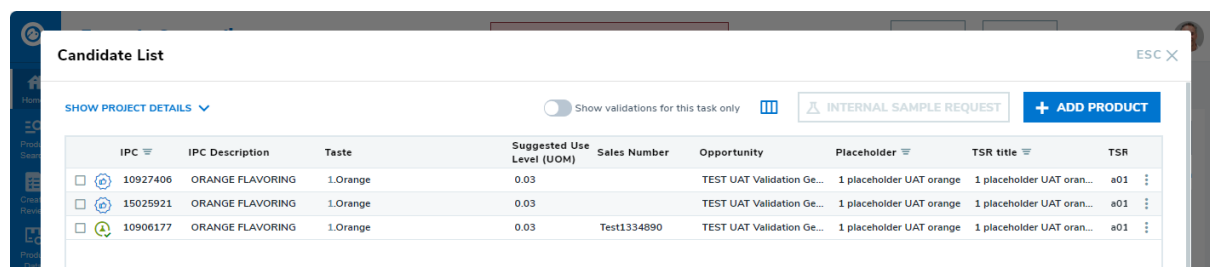

After selecting "add candidates", IPCs will be added to the candidate list if they are not already included. Each IPC can only be added once.

The system will restrict the user until the duplicate IPC is deleted, after which the user can continue.

Click "View Candidate List" to see the newly added IPCs.

Validation of an IPC via search.

Creating Sales ID

There are three options when for the creation of sales codes:

- Generate a new Sales ID
- Select an existing Sales ID which already belongs to a corporation.

When a combination of the IPC and customer already exists, the Sales ID will be filled and not editable. Only end-use and Suggested Use Level will be available for editing.

- Select an existing Sales ID from another Entity.

The screenshot shows a web application interface for creating a Sales ID. At the top, there are tabs for 'Sales ID', 'Entity', 'Opportunity', 'Project', 'Dosage', and 'Submitted By'. The 'Sales ID' tab is active. Below the tabs, there is a message: 'No Corporation to View. It seems like there is no corporation details.' The main form area contains several fields: 'Submission ID' (with a 'Generate Sales ID' button highlighted in a green box), 'Sales Name', 'Customer Material Code', 'EndUse' (with a dropdown menu showing '32005 - CEREAL GRAIN BARS'), 'Suggested Use Level' (with a dropdown menu showing '0.5000 % in Customer Finished Goods'), 'Product Branding' (with a dropdown menu showing 'IFF'), and 'Label'. A 'Comment' field is also present. At the bottom, there is a warning message: 'Warning! A change to the Sales Name/Product Branding and/or the Customer Material Code will automatically make the same updates in SAP-2CU/SN sales org 0001. Please note: The same updates in local sales orgs (X03) where this data exists need to be done manually.'

A new Sales ID can be generated by clicking the Generate Sales ID hyperlink.

This will open a pop-up window where items such as Sales ID; Sales Name; Customer Material Code and Product Branding can be edited.

Also, you have the option to add a comment in the Comment field.

The screenshot shows a pop-up window titled 'Generate New Sales Number' with an 'ESC' button and a close icon. The window contains several input fields: 'Customer ID' (0000013636), 'Customer Name' (Customer Name), 'IPC' (00327454), 'Description' (CINNAMON/CASSIA GRD PRIMA HEAT), 'Sales ID' (SC1289638), 'Sales Name' (CINNAMON/CASSIA GRD PRIMA HEAT), 'Cust.Mat.Code' (Customer Material Code), 'Product Branding' (IFF), and 'Comment' (Enter the Comment). There is also an 'Active' checkbox and an 'OK' button at the bottom.

Taste Editor &
Formula Sommelier

When a combination already exists between an IPC and a Corporation, the Sales ID can not be changed.

When all required fields are filled and checked the validation can be confirmed by clicking OK or abandoned by clicking Cancel.
