

PRODUCT BOM RIGHTS

November 2024

INNOVERSE

Table of Content

- Bom Rights Overview
- Security Model
- Process Changes

OVERVIEW

In our organization, accessing a product's **Bill of Material (BOM)** is a privilege that hinges on **security clearance** on a need-to-know basis.

SECURITY FRAMEWORK

What Has Changed

- Very few individual rights will be created vs 150M existing in IFFman
- Framework based on algorithm or checker

ACCESS CHECK

Algorithm based solution that will check for:

- Trustee
- Exceptions
 - R&D Flag
 - Entity
 - Manual Grant
- Role/Product Type
- Global Vs Regional

MASTER DATA

- Users will be assigned to a Role.
- Based on Role, Product Types will be accessible or not
- If user changes role, **does not inherit** past rights but now governed by **new role** rules.
- Product types and roles maintenance

DATA PROTECTION

- Bom view activity is logged
- Unusual pattern **"Detection tracking"** is being developed (Standard Deviation Method)
- Standard reports will be developed for leadership

SECURITY MODEL

IC&D Leadership **owns the governance** for BOM rights. As we replace IFFMan, there is a need for **simplification** to the overly complex processes in place today. Security Requests will govern the on boarding or changing role of user. User needs to request access like for like as today's process.

Roles for IC&D

- VIP
- Flavorists Global
- Flavorist Regional
- Seasoning Designer Regional
- System Designer Regional
- Emulsion Designer Global
- Food Technician JBC
- T&K Designer
- Non IC&D Roles (FAD, GRA ..)

Definitions

- VIP – Has full access to all IPC's
- Global – Has full access to IPC's for Product Types selected in all regions
- Regional - Has full access to IPC's for Product Types defined in the region they are located (PML, Responsible Org defines region(s))
- Food Technician JBC Dedicated Group in Europe
- T&K Designer – Dedicated Group in Greater Asia

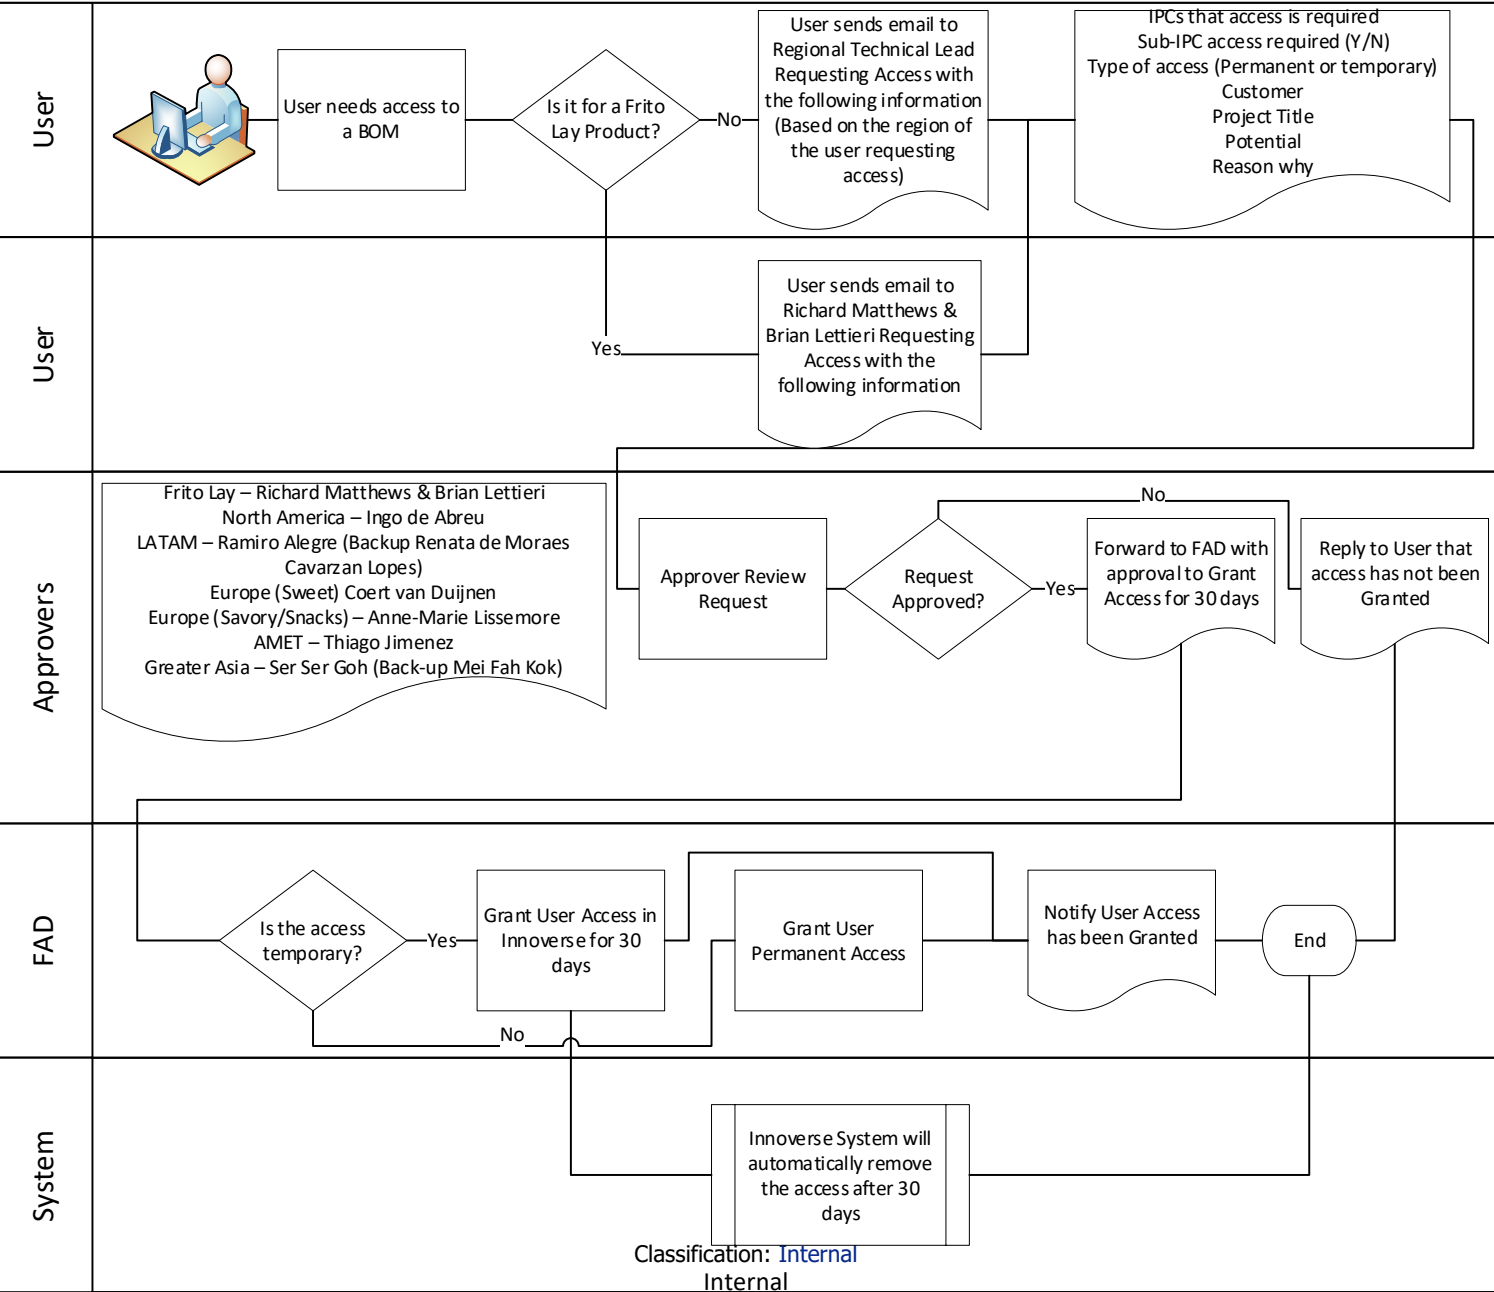

Exceptions

- Trustee
- Exception Bom Right - Manual
- Frito Lay – Entity Group
- POE R&D CBW – Flag Group

Note: Standard duration of manual BOM right access is 30 days.

Requesting IPC Access
